5. Cleaning instructions .....	12

## **Safety instructions**

- 1.** Read the Operation Manual before using rinser. Keep Operation Manual handy.
- 2.** Always shut the water off at the source before cleaning, moving, or servicing.
- 3.** Turn water off when not in use.
- 4.** Never operate rinser without a blender jar (or other drink container) in place.
- 5.** Avoid contacting the spray nozzle while the system is pressurized.
- 6.** Never use the unit if it is not secured to the work surface with the suction cups provided.
- 7.** Do not rinse cracked or broken glassware with this rinser.
- 8.** Install unit with appropriate backflow protection. Backflow prevention must be installed to comply with federal, state, or local codes that have jurisdiction over the location.
- 9.** Do not use outdoors.
- 10.** Do not use water that is hotter than 120°F (48°C) in the rinser.
- 11.** Do not use appliance for other than intended use.
- 12.** Not intended for use by or near children.
- 13.** Do not operate with a damaged water hose or fitting or after the appliance malfunctions, or is dropped or damaged in any manner.

# Blender Rinser

## Parts and Features

The following items are included in your package:

- Rinser
- Water Hose With Female Swivel Garden Hose Connector
- Filter and Washer
- Owner's Manual

## Installation Instructions

- 1.** Place rinser in sink where it will be used. Ensure the suction cups adhere the rinser to the bottom of the sink. Install either the gasket or mesh filter into the connector.
- 2.** Attach water hose to water supply. Turn on water. See safety instructions.
- 3.** Place a blender jar or container (2 liter or smaller) upside down over the spray nozzle.
- 4.** Press the blender jar or container down to prime the rinser. A steady spray of water should come from the nozzle into the blender jar. To stop the flow of water, release the pressure on the blender jar.

## Operating Instructions

- 1.** Place a blender jar or container upside down over the spray nozzle.
- 2.** Turn on water. See safety instructions.
- 3.** Press the blender jar or container down to activate the spray of water from the nozzle.
- 4.** Press down for 2 to 5 seconds or until fully rinsed. Release the pressure on the jar to stop the spray of water.
- 5.** Remove blender jar or container. Place jar upside down to dry.
- 6.** Turn off the water supply when rinser is not in use to prevent accidental spray from nozzle.

# Blender Rinser

## Instructions for Cleaning

### External

1. Shut off water and disconnect the water hose from the water supply.
2. Pull rinser away from sink bottom to release suction cups.
3. Wash rinser in sink with warm, soapy water.
4. Rinse with clean water and dry completely.
5. Replace rinser in the sink. Ensure suction cups adhere rinser to bottom of sink; then reattach water hose to the water supply.

### Internal

1. Follow Steps 1 and 2 from above.
2. Unscrew spray nozzle from base. Gently separate rinser base and remove spring. (Be careful not to lose spring.)
3. Soak rinser components in warm, soapy water.
4. Rinse with clean water and dry completely.
5. To reassemble rinser: Slide spring over post and place rinser top over post. Press down on rinser top to expose threads of post. Hand-tighten spray nozzle onto post.
6. Place rinser in sink, moving and pressing to ensure suction cups are stuck to sink. Attach water hose to water supply.
