

Repair Instruction

Blenders and jars

from 29-12-2022

Remember that blender jars should not be washed in the dishwasher. This dramatically shortens the life of your jar.

You also cannot put fruit mixtures in the blender at a temperature below -19 degrees, otherwise the blender blades could break or the blender socket (in which you put the bowl) would be disturbed.

Step 1

Send your jar or blender directly to our technician at the following address:

Transport Partners

to Fresh Fruit Express

Houtzagerij 2

4651 SN Steenberghe The Netherlands

Step 2

Clearly state the return address and the problem on a cover note.

Step 3

To return a blender with a sound enclosure, remove the sound enclosure (and save the 3 Waring screws). So you only send the bottom of the blender with the rubber mat still on it.

Any damage to the sound enclosure is your responsibility.

For any questions, you can send a WhatsApp to +31-6-21285666.
