# Return instruction

## blenders and jars for repair

*Remember that the blender jars should not be washed in the dishwasher. This significantly shortens the life of your jar and blender. Don't blend our smoothies mixes colder than 19 degrees in the blender for easy blending. Otherwise the knives in the blender may break off or the blender socket (in which you put the jar) may be damaged.*

**Step 1:** Send your jar or blender directly to our mechanic at the following address:

Transport Partners  
to Fresh Fruit Express  
Bronkhorststraat 8  
4651 SZ Steenbergen  
Holland

**Step 2:** Clearly state the return address and the problem on a note.

**Step 3:** To return a Waring blender, remove the sound enclosure and rubber mat and store the 3 screws! **In other words, only send the bottom of the Waring blender.**
