Introduction

From Brazil to Europe: The Story Behind Fresh Fruit Express

In 1993, I embarked on a five-week journey through Brazil, a country renowned for its rich culinary diversity, exotic fruits, and refreshing beverages. One of the highlights of my trip was the abundance of fresh smoothies sold at street stalls in every city I visited. These naturally vibrant, delicious drinks quickly became a daily indulgence.

Fast forward to 2007, when I was looking to expand my business. I reflected on my time in Brazil and the incredible smoothies I had enjoyed. Recognizing the growing demand for healthy options in Europe, I saw a unique opportunity to introduce these flavors to the market – starting in the Netherlands. My vision was to bring the same fresh, natural experience to the hospitality industry as a complete concept.

At the time, health-conscious choices were gaining popularity, and I embraced this trend by using frozen smoothie fruit that required no added sugar. To further enhance quality, we developed a special smoothie base fruit juice to prevent separation and introduced three veggie-based smoothie options.

These innovations led to the launch of Fresh Fruit Express and Veggie Express.

But we didn't stop there. To ensure consistency and ease of preparation, we needed an efficient, high-performance blender. This led us to design our own line of high-quality, user-friendly blenders. With the perfect combination of premium fruit, innovative recipes, and professional equipment, our smoothie concept took off. Today, we proudly serve our products in 17 countries and have become a leading blender distributor.

We are incredibly proud of what we've built – a complete, high-quality solution for the food service industry. Every day, we receive enthusiastic feedback from our hospitality partners and their customers, reaffirming our passion for what we do.

If you'd like to learn more about our products, feel free to reach out to me or one of my colleagues. We'd love to share our experience with you!

"Since 2007, I have been passionately dedicated to selling, distributing, and developing the smoothie concept. Every day, we help food service and catering businesses delight their customers with a healthy and refreshing choice."

Blenders and Slush Machines for Repair

Please remember that blender cups must not be washed in the dishwasher. This significantly shortens the lifespan of your cup.

Also, do not put fruit mixes in the blender at temperatures colder than -19°C, as this may cause the blender blades to break or the blender socket (where the cup is placed) to become misaligned.

Step 1 Send or bring your blender or slush machine directly to our technician at the following address:

Transport Partners attn. Fresh Fruit Express Houtzagerij 2

4651 SN Steenbergen The Netherlands

Step 2 Clearly state the above return address and the issue on a note. If you fail to do so, it is at your own risk and expense. The blender or slush machine will not be processed. **Dirty blenders will also not be accepted.**

Step 3 For returning a blender with a sound enclosure, remove the enclosure (and keep the 3 screws of the Waring very carefully).Only send the blender base with the rubber mat still attached.

Any damage to the sound enclosure is at your own expense. For questions, you can send a WhatsApp message to +31-6-21285666.
